Roof Features	1x6" rough sawn Hemlock Exposed Collar Ties			

HOW MANY CORDS?

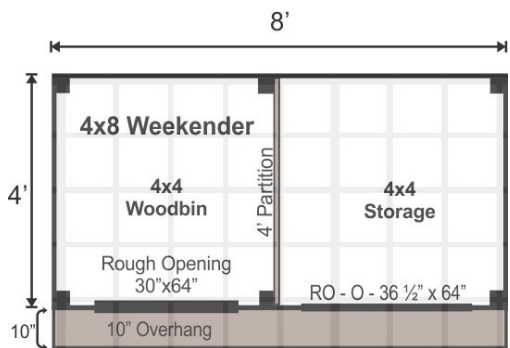

When choosing your Weekender, consider how many cords of wood you typically use. If you live in a colder climate and rely on firewood for your heating, expect to use four to five cords of wood to get you through the winter.

Whether you only light the occasional fire for ambiance, or you rely on a wood burning stove for your heating, we have a Weekender that will fit all your tinder.

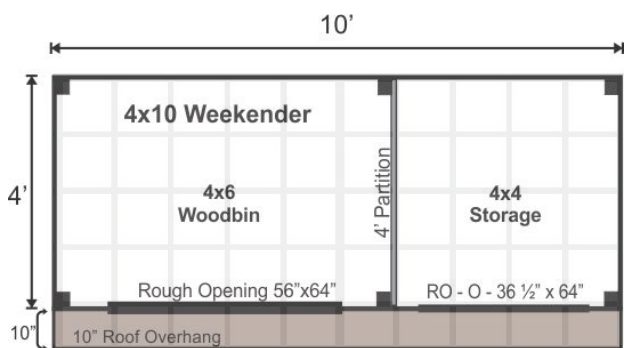

You should keep your firewood neatly stacked to encourage airflow and help it dry.

FEATURES

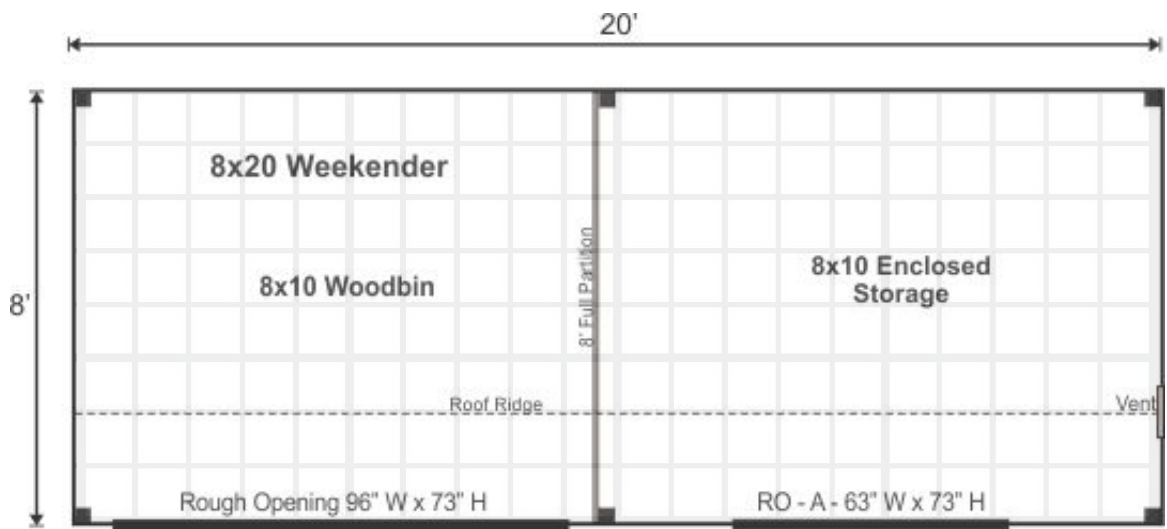

Ramp it up!

The Weekender comes with a ramp that is sized to the building's door to help you load up your lawnmower or any other equipment you need to wheel inside. Add a second ramp for even more convenience!

Customers added a second ramp

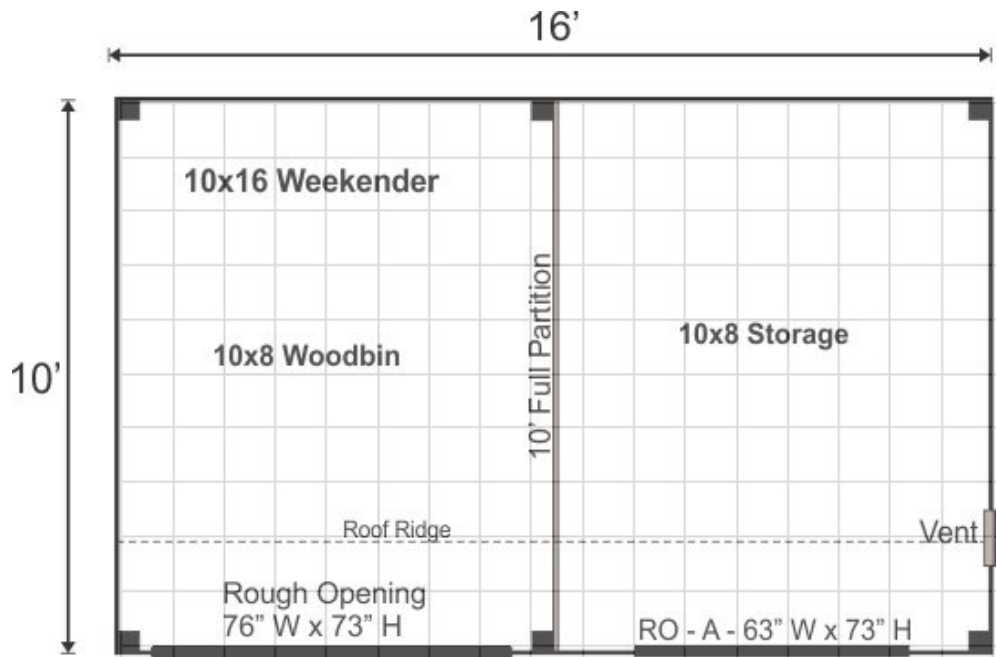

Saltbox Style Roof

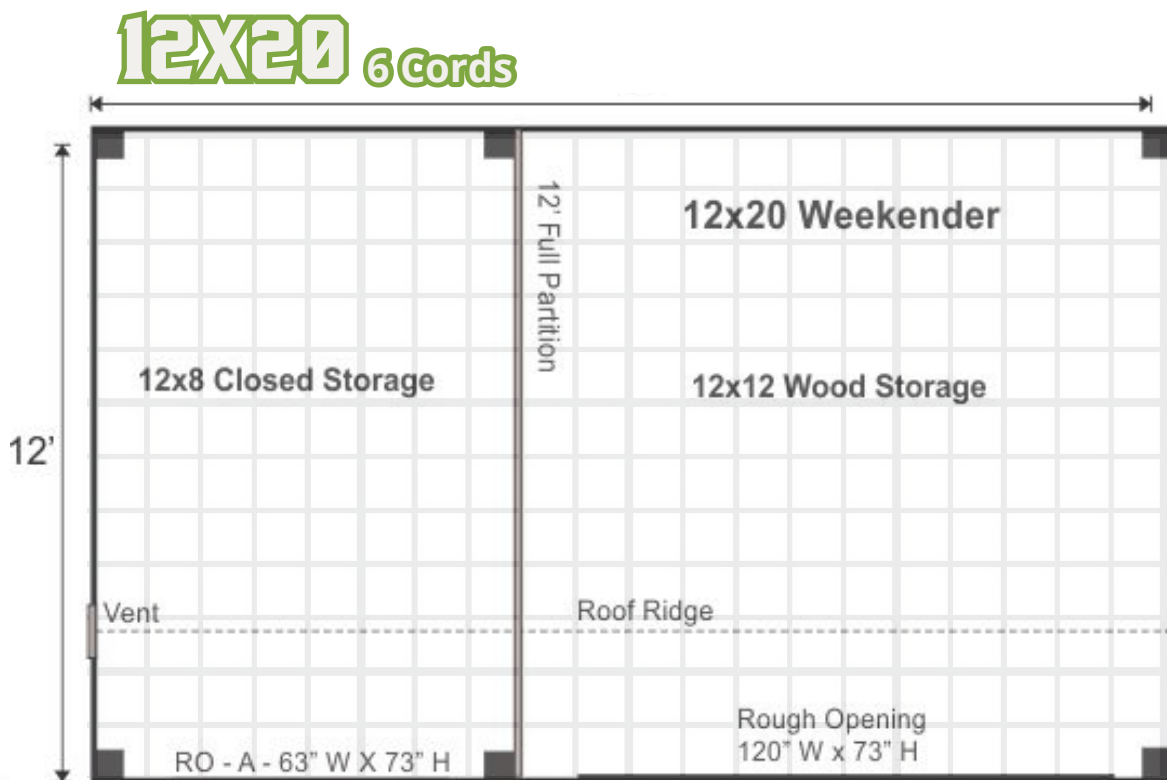

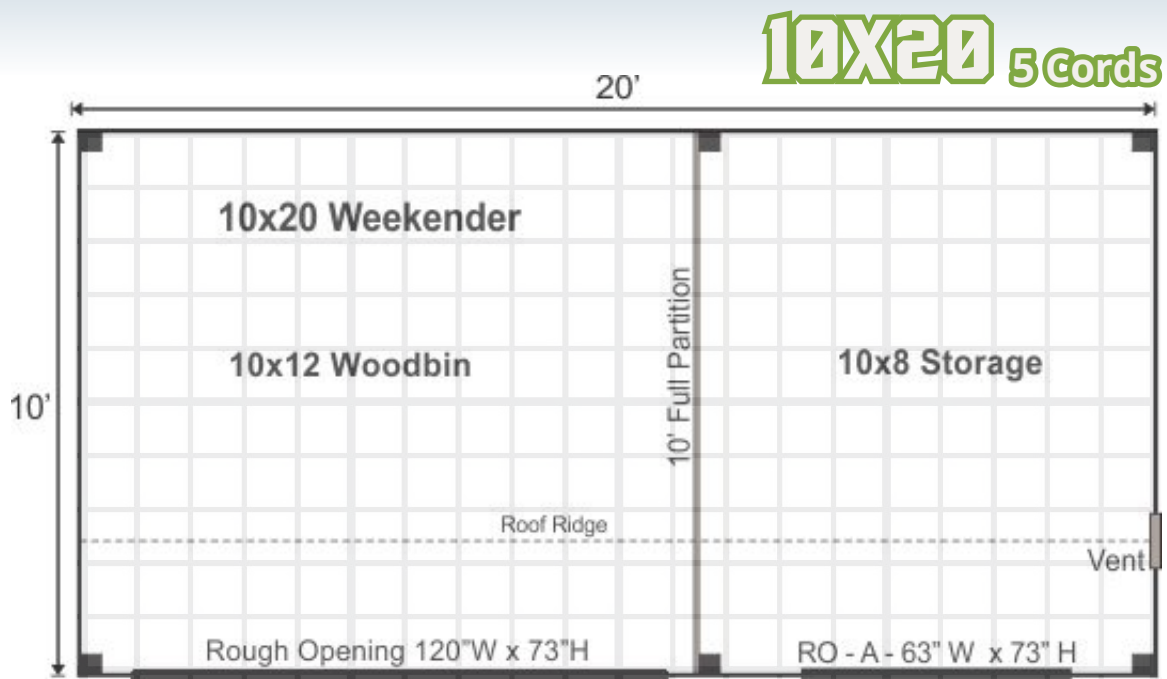

The classic saltbox style roof sheds most water and snow to the rear of the building. The eaves on the front help keep moisture from entering the wood storage compartment. You'll love the classic design and practicality of this roofing style.
